

Agriprocessors

We have been doing business with Agriprocessors for several years. We have always been happy with their process. Agriprocessor's word has always been true when a deal was to be done a certain way it was. We as producers are adding value to livestock, grain, grain co-products. We are providing jobs and a better living for grain farmers, truckers, bankers, grocers, and consumers. Agriprocessor is adding value to the cattle while employing many people who in turn add value to other local businesses. We sell to many harvesting plants, but the type of cattle we produce work best for Agriprocessor. We appreciate having them as close competitive local market. The United States of America is an adverse nation; Agriprocessors has a market system for a portion of our nation's people.

Shalom Rubaskin is our head buyer, we barter our business deals. When we agree our verbal agreement has always been good.

Thank You

Douglas Sandven
