PO Box 355
Waverly, IA 50677-0355

June 19, 2006

To whom it may concern:

We at the Waverly Sales Co. would like to say that we think it is very important to the cattle feeders that Agri-Processors in Postville, IA be able to continue slaughtering cattle for meat consumption. Agri-Processors has been a very strong market for cattle feeders in this area. There is no other cattle slaughtering plant in the area and with high gas prices and high trucking fees, it is really important that they are here.

They also have helped 4-H and FFA students with their cattle in the past by slaughtering them and giving them a report on how they cut out. This is important for the students to know the different grades of cattle, so they can determine how best to feed them to get the best grade.

We appreciate and need Agri-Processors so we can give the consumer great quality meat products.
